

Nature of functions/ services offered

Research, Teaching and Training in Agricultural Statistics, Computer applications and Bioinformatics

Computational and informatics services to all ICAR Institutes and Agricultural Universities throughout the country

We are involved in developing statistical methodologies/tools/techniques, IT based systems/ computational solutions including bioinformatics tools to support agricultural research and development in the Country through National Agricultural Research and Education System (NARES) and National Agricultural Statistics System (NASS). ICAR-IASRI supports the Researchers and Agricultural Scientists of the country in agricultural research, however, we do not directly deal with the farming community/common-public.
